

DATASHEET

RAPTOR W

GENERAL

Art.Nr:	HSG-040-8
GTIN:	4030281224020
E-class number:	40-02-01-03
Customs tariff number:	84798997

Standards:	EN 360:2002
Net weight:	4.55 kg
Gross weight:	4.55 kg

DATASHEET

RAPTOR W

The RAPTOR W retractable type fall arrester with self-retracting textile strap and automatic blocking function allows safe work at height and depth.

RAPTOR W has a modular design so that all components can be replaced individually, which reduces inspection times and maintenance costs. An energy-absorbing inlet damper protects the device housing and the internal mechanics, so that continuously occurring impacts can be reduced and hand injuries can be excluded when pulling in the rope.

The retractable type fall arrester has two fall indicators visible to the user, which indicate the device's functionality even from the outside. A red indicator warns the user as soon as the device needs to be checked. The user is thus protected from a product that is no longer operational and additional time can be saved during the annually prescribed inspection. The sophisticated housing design also allows space-saving and device-friendly storage.

RAPTOR W is certified according to EN 360:2002 and secures one person at a maximum user weight of 140 kg. The maximum service life is 20 years.

- Easy and economical maintenance thanks to modular design and two drop indicators
- 20 years lifetime due to energy absorbing inlet damper, which protects the device housing in the best possible way
- Space-saving storage and optimal handling due to special design of the case

FEATURES

Application areas:	Various
Colour:	Black
Edge approved:	No
Max. user weight horizontal:	0.00 kg
Maximum user weight vertical:	140.00 kg
Maximum lifetime:	20 years
Maximum number of persons:	1
Minimum user weight:	40.00 kg

DIMENSIONS

Rope length:	8.00 m
--------------	--------

MATERIAL

Material:	Aluminium, Steel, Polyester, Stainless Steel
-----------	--
